

Beat insurance fraudsters and be protected if an incident occurs.

6th Sense Kestrel 2019 Dash Camera – more features, lower price: -

With High resolution, 1080p/1296p recording and 170 degrees view this neat and compact dash-cam offers features only associated with higher priced cameras. *See actual video Footage at www.6st.co.uk/systems/dash-camera-kestrel-2019*

- ✓ To maximise its coverage – **Kestrel Dashcam indicates its recording status**
- ✓ Key events are “Bookmarked” in the memory to avoid over-recording
- ✓ Still photographs can be taken or extracted from the video files
- ✓ A **second camera** can be installed for use as a reversing or near-side monitoring aid. Watch the kids in the back!
- ✓ **Audio recording** is a switchable option
- ✓ Takes minutes to install/swap into another vehicle. Plugs into 12V or USB power socket
- ✓ Comes with a **2-year warranty**

The camera goes into standby mode when the ignition is off, or the unit is unplugged. However, if a significant impact is felt by the built in **G Sensor** this triggers the **Internal battery**, restarts the recording providing 24/7/365 coverage whilst parked.

Full HD 1296p Kestrel Dashcam footage – showing no logical reason why the VW stopped halfway around a roundabout causing this accident

“compressed image, genuine footage is even better than this”

Unit 40, Trent Valley Trading Estate, Station Road, Rugeley, Staffordshire WS15 2HQ
A company registered in England and Wales 10790407

FHD

6th Sense has been searching and testing dash cameras for some time, but until this one, all have been missing some key element or were too costly. This is the best camera that 6th Sense have tested and are pleased to offer a product in line with our company policy of providing great quality, proven products tested by ourselves to give good value to our customers

The images are sharp and clear during the day or at night, we have compared to many that claim 1080p/1296p. We confidently say it is better than most, certainly for the price and features it offers.

A rear-facing (2nd) camera can be installed internally or externally looking back from the front windscreen, or through the rear window.
